

## SYSTEMS

With a variety of lifting capacities and stroke lengths available, EQ Systems can provide a lifting or leveling system that fits your needs and specifications. These rugged, American made jacks can be purchased as part of a lifting/leveling system or individually to be added to your existing hydraulic system.

## EQ <br> \section*{SYSTEMS}

## HYDRAULIC PUMPS

- One pump assembly operates all jack legs
- Variety of manual override options are available
- Heavy duty 12 or 24 volt
- Can be mounted in powder coated steel box or tray

OPEN SPOOL MANIFOLD

- Dual or quad options
- Lift-truck style levers
- Reliable operation

- Pilot operated checkhydraulically locks leg in place
- Mechanical lock out barsphysically locks leg in extended position
- Keyed switchgearprevents unauthorized use of the system

## SWITCHGEAR

- Switchgear made in-house
- Performance Verification Tested
- Braided nylon exterior for durability and protection
- Single, dual or quad switchgear available
- Custom lengths available
