EQSystems.us

This EQ Smart-Level hydraulic six point system is designed for most fifth wheel trailers. It replaces your current electric front jacks and rear manual stabilizer jacks. This system will allow you to operate the front two jacks independently from the leveling system to get your trailer off of your truck for easy unhooking and hooking up of your trailer.

Then with one push of a button our system will automatically level your trailer in no time. Our EQ Smart-Level control also allows you to adjust the level for any reason.

This EQ Smart-Level System gives you full control over your system. All of our harnesses are protected by a PVC coated nylon braid and have waterproof connectors. Our system includes a heavy-duty, commercial grade pump, that has manual override capability in case you ever have a problem or power failure.

Compatible with iPhone, Android, and many multi-plex systems for OEM applications.
