Revisions

1	ECN #3714, added the note on hose fittings for the 3" in floor slide (now 90 degree fittings)
2	ECN #3772, changed dinette slide hoses to mech 2, now 16" longer for routing
3	ECN #3845, flow divider is replaced by the synchronizing cylinder (all field units as well)

EQUALIZER JACKS (FULLY AUTOMATIC)
STANDARD ON THIS UNIT**

Notes:

- 1) Jacks mount to chassis brackets with the lowest holes of the jacks aligned with the lowest holes of the mounting brackets.
- 2) Level sensor attaches to bottom of structure; on the square tube the runs full length from axle to axle.
- 3) Hydraulic hose terminations for room #1 & #3 require 90 degree swivel elbows.
- 4) Hoses marked w90 will have the 90 deg fitting shipped loose.

EQUALIZER JACKS (FULLY AUTOMATIC)
STANDARD ON THIS UNIT**

Notes:

- 1) Jacks mount to chassis brackets with the lowest holes of the jacks aligned with the lowest holes of the mounting brackets.
- 2) Level sensor attaches to bottom of structure; on the square tube the runs full length from axle to axle.
- 3) Hydraulic hose terminations for room #1 & #2 require 90 degree swivel elbows.
- 4) Room #1 will have a non-powered slide mechanism in center of room
- 5) Hoses marked w90 will have the 90 deg fitting shipped loose.

EQUALIZER JACKS (FULLY AUTOMATIC)
STANDARD ON THIS UNIT**

Notes:

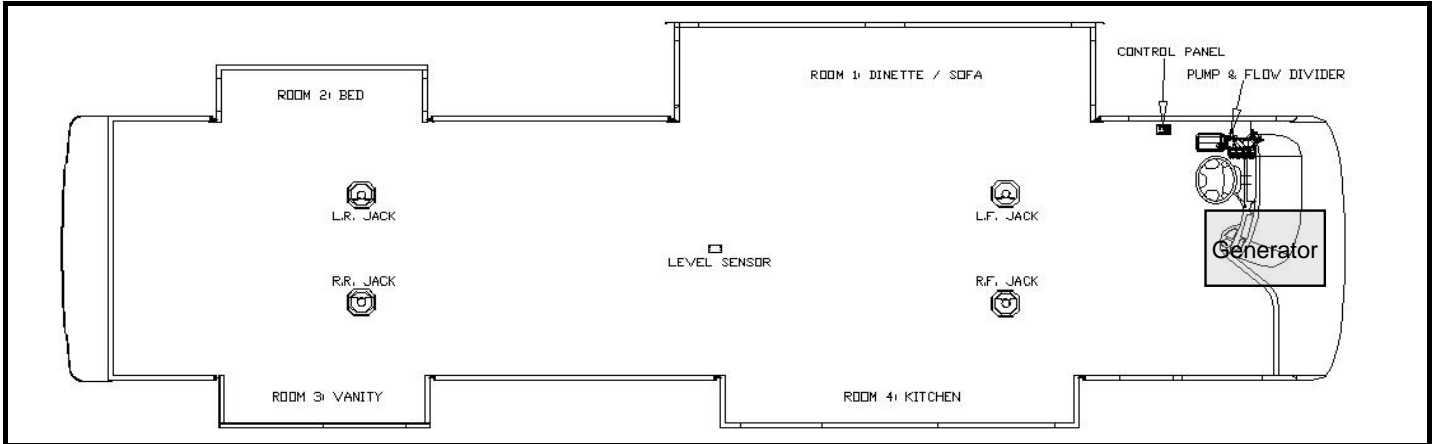

- 1) Jacks mount to chassis brackets with the lowest holes of the jacks aligned with the lowest holes of the mounting brackets.
- 2) Level sensor attaches to bottom of structure; on the square tube the runs full length from axle to axle.
- 3) Hydraulic hose terminations for room #1, #3, & #4 require 90 degree swivel elbows.
- 4) Reference FM-3991 for a better visual of Room 4 hydraulic connections.
- 5) Hoses marked w90 will have the 90 deg fitting shipped loose.

EQUALIZER JACKS (FULLY AUTOMATIC)
STANDARD ON THIS UNIT

Notes:

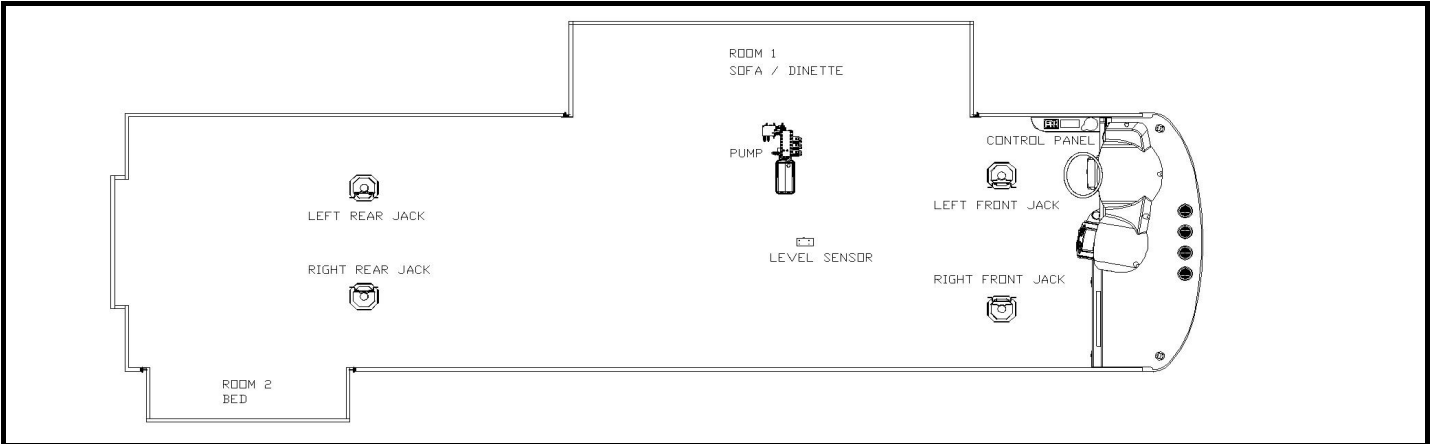

- 1) Jacks mount to chassis brackets providing 8-9 inches of ground clearance with the air bags dumped.
- 2) Level sensor attaches to bottom of structure; on lower hat section flanges or square tube.
- 3) Hydraulic hose terminations for room #1 & #3 require 90 degree swivel elbows.
- 4) Hoses marked w90 will have the 90 deg. Fitting shipped loose
- 5) All in floor slides to have automatic travel lock sensor

EQUALIZER JACKS (FULLY AUTOMATIC)
STANDARD ON THIS UNIT**

Notes:

- 1) Jacks mount to chassis brackets with the lowest holes of the jacks aligned with the lowest holes of the mounting brackets.
- 2) Level sensor attaches to bottom of structure; on the square tube the runs full length from axle to axle.
- 3) Hydraulic hose terminations for room #1, #3, & #4 require 90 degree swivel elbows.
- 4) Reference FM-3991 for a better visual of Room 4 hydraulic connections.
- 5) Hoses marked w90 will have the 90 deg fitting shipped loose.

Notes:

- 1) Jacks mount to chassis brackets providing 8-9 inches of ground clearance with the air bags dumped.
- 2) Level sensor attaches to bottom of structure; on lower hat section flanges or square tube.
- 3) Hydraulic hose terminations for room #1 & #3 require 90 degree swivel elbows.
- 4) Hoses marked w90 will have the 90 deg. Fitting shipped loose
- 5) All in floor slides to have automatic travel lock sensor

1	4-23-08, Updated to match EQ's new way of plumbing jacks.

**42C SAHARA
EQUALIZER JACKS (FULLY AUTOMATIC)
STANDARD ON THIS UNIT**

- Notes:**
- 1) Jacks mount to chassis brackets with the lowest holes of the jacks aligned with the lowest holes of the mounting brackets.
 - 2) Level sensor attaches to bottom of structure; on the square tube the runs full length from axle to axle.
 - 3) Hydraulic hose terminations for room #1 & #3 require 90 degree swivel elbows.
 - 4) Hoses marked w90 will have the 90 deg fitting shipped loose.

Note:

Full 2009 will be on April 8, 2008 release for diesel units, and April 21, 2009 for gas units. Units listed as New Model have not been given to us yet to build systems for. On the Super "C" all of the existing units will be obsolete somewhere around 50 units into the new model year, and the only units that will have our stuff on them are the new ones.

EQUALIZER JACKS (FULLY AUTOMATIC)
STANDARD ON THIS UNIT

- Notes:**
- 1) Jacks mount to chassis brackets with the lowest holes of the jacks aligned with the lowest holes of the mounting brackets.
 - 2) Level sensor attaches to bottom of structure; on the square tube the runs full length from axle to axle.
 - 3) Hydraulic hose terminations for room #1, #2, & #4 require 90 degree swivel elbows.
 - 4) Reference FM-3991 for a better visual of Room 1 hydraulic connections.
